In view of the appeal brief filed on February 6, 2003, PROSECUTION IS HEREBY REOPENED. New grounds of rejection are set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-51 are rejected under 35 U.S.C. 102(e) as being anticipated by Apps et al. ('461).

Apps et al. ('461) discloses a low depth nestable display crate which holds two liter beverage bottles made of polyethylene terephthalate (PET) material and is inherently capable of holding bottle carriers such as beverage cozys with a beer bottle in each beverage cozy.

Claims 15-19, 21-26, 50 and 51 are rejected under 35 U.S.C. 102(e) as being anticipated

by Apps et al. ('482).

Apps et al. ('482) discloses a low depth nestable display crate which holds beverage bottles and is inherently capable of holding bottle carriers such as beverage cozys with a beer bottle in each beverage cozy or larger two-pack, four-pack, six-pack or eight-pack bottle carriers.

Claims 28-30, 32-39 are rejected under 35 U.S.C. 102(b) and/or (e) as being anticipated by Koefeldt ('843).

Koefeldt ('843) discloses a low depth nestable display crate which holds one liter beverage bottles (B) in a 3 by 5 array (see Fig. 16-18) and is inherently capable of holding bottle carriers such as beverage cozys with a beer bottle in each beverage cozy or larger two-pack, four-pack, six-pack or eight-pack bottle carriers.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-51 are rejected under the judicially created doctrine of double patenting over claims 1-5 of U. S. Patent No. 5,979,654 to Apps and over drawing figures 1-12 of U.S. Patent No. D400,012 to Apps since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

. Art Unit: 3727

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: A low depth nestable display crate for six-pack bottle carriers comprising a floor, a double thickness wall structure having a lower wall portion, an upper wall portion and a handle bar.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
